**(only this mixer is applicable for this live-set!)** IMPORTANT: NO DJ MIXER, as there are two mono inputs that will not work with a standard DJ Mixer  
The artists are using a total of 11 outputs which use a quarter inch output (guitar cable) from their source. A total of **20** mono jack to jack cables and 3 MIDI cables is needed. This means that along with the mixer you are providing, you will need to provide cables from THEIR quarter inch source to the input you have on your Mixer.

  - 1 x profesional audio engineer, taking care of the PA
  - Soundcheck required (70-85min.)
  - The Set Up is complex and need to be left where they are after sound check.
  - There will be NO line checks during a party in a Club
  - A place where Steve can put his gear, case safe before and after the performance (backstage)
