

DJ RIDER BARBARA PREISINGER

- 1 x high quality 4 channel dj-mixing desk
XZONE:92 / 96 by Allen & Heath is preferred
- 2 x technics sl 1200/1210's with slip mats
- 2 x high quality pitchable USB cd player: Pioneer CDJ-3000 - linked
- 2 x extra set of high quality turntable cartridges
- high quality sound system
- 2 x high powered stereo monitor speakers, adjustable from the dj-mixing desk
- 1 x table or box or similar, 80 cm high, 100 cm long, right behind the DJ desk
for placing the record bag, if possible with back wall / back board.

SET UP IN THE DJ BOOTH (in case CDJ's are not installed hanging):

CDJ – Technics – DJ MIXER – CDJ – Technics

or

Technics – CDJ - DJ MIXER – Technics - CDJ

!!! IMPORTANT !!! :

- Please make sure that the equipment is available as mentioned above!
- It must be assured, that everything is set up for vinyl plus USB dj-ing when I'm supposed to start. This includes all cable connections from the decks and CDJ's to the mixer, monitors etc. I want to avoid the situation of setting up cables by myself when I'm already playing.
- It must be assured that the Technics turntables are standing on a solid ground, that is not shaking or moving (inflatable air cushions under the decks are not acceptable). The turntables have to be set up in a way that there can't come up any feedback from the monitors or bass speakers.
- The turntables, the cartridge systems and the stylus itself must be in top condition!
- In case the dj booth is on the same level as the dancefloor, it must be assured that the dancing crowd is not bumping against the booth accidentally, causing jumps of the records.
- If possible it would be great to have a little soundcheck before the party starts.
- Lights: No direct lights or bright spotlight onto the artist. There should be enough light to see everything on the dj mixer as well inside the dj booth
